

Model : **TDF-C**
 Description : Delay-Off Through Contacts

Utilization:

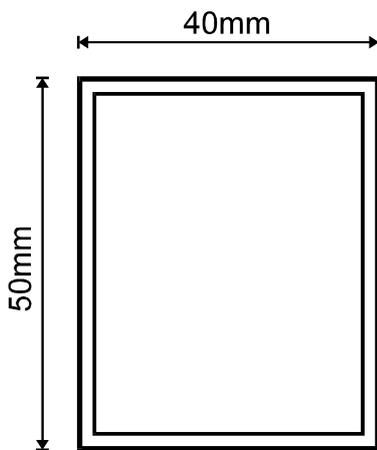

When terminals 3-4 is shorted, the output contacts 8-6 is closed immediately.
 When terminals 3-4 is re-opened, there is a delay of 25 sec. before the output contacts 8-6 re-opened.
 This relay can be used to delay the automatic switching-off of lights in a room, after the removal of the key-switch, so that the occupant has time to exit room. The volt-free output contacts are rated at 5A 240VAC.

Technical Data

Supply Voltage : 240VAC 115VAC
24VDC 12VDC
 Frequency : 50/60 Hz
 Consumption : 3 VA
 Indication : Green LED - Power
 Red LED - Up
 Output Contacts : 5A 240V 50Hz AC1
 Relay ON 8-6 Close
 8-5 Open
 Relay OFF 8-6 Open
 8-5 Close

Dimensions: The TDF-C is 40 x 50 x 58mm high and plugged into 8-pin sockets mounted on standard DIN Rail.
